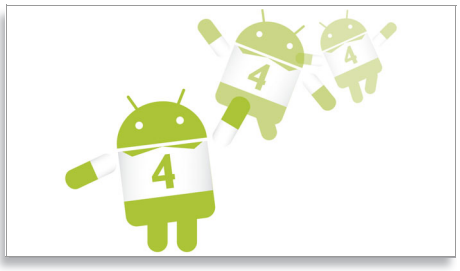
Highlights

Android 4™



Google-certified Android 4™ for best web surfing experience

Fullsound™ - Tablet

Philips' innovative FullSound technology faithfully restores sonic details to compressed MP3 music, dramatically enriching and enhancing it, so you can experience truly immersive music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor. The result is fuller bass with more depth & impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed MP3 music in true-to-life sound that will touch your soul & move your feet.

Acoustically tuned speaker

Pure balanced sound is achieved by expert acoustic tuning for the speaker elements. In particular, the high tones and deep bass are reproduced with greater precision.

Hi-Market

Enjoy great applications from the Hi-Market. Just click on the icon on your Philips entertainment tablet to connect to the Hi-Market via Wi-Fi, and start your search for apps. Download games, tools and e-books, or apps to personalize your entertainment tablet – for free or for a small sum. The clear, easy-to-use interface lets you browse intuitively through applications which can be sorted according to rating, category or popularity. Download apps directly to your tablet and enjoy them instantly.

17.8cm (7") TFT color LCD

The high resolution color LCD display brings images to life, showing off your treasured photos, favorite movies and music with the same 'real life' rich detail and vibrant colors as high quality prints.

16:9 screen

The 16:9 widescreen aspect ratio is standard for universal to high-definition digital television. A native 16:9 aspect ratio means video display without bars at top and bottom of the picture and without the quality loss than comes from scaling, altering an image to fit on a different screen size.
